New HIVE Range

Think outside the BOX..

We've been busy as bees, creating a whole new world of flexible, open-ended play for you.

More connection

More play

More possibilities

ABOUT US

Outdorable is a family-run business born out of a deep passion for children and their development. Inspired by our own experiences as parents and a love for the outdoors, we created a range of high-quality outdoor play equipment and furniture designed to spark imagination, foster creativity, and encourage healthy play.

Founded in 2016 by the Woodman Family in the picturesque Tasman Bay, New Zealand, Outdorable has grown to become a trusted brand enjoyed by children in over 10 countries. Our products are carefully crafted with a focus on safety, durability and fun, ensuring that every child can experience the joy and benefits of outdoor play.

At Outdorable, we believe that childhood is a precious time filled with wonder and exploration. Our goal is to provide children with the tools they need to thrive and develop a lifelong appreciation for nature. We are committed to creating products that inspire, engage, and enrich the lives of young people.

WHY OUTDORABLE?

BUILT TO LAST FOR GOOD

Every piece of Outdorable play equipment is designed to earn its place in your outdoor learning environment for the long term. With the introduction of the HIVE Collection, you can now choose the material that best suits your setting: high-performance HDPE and aluminium, or premium natural Accoya timber. Each collection offers its own advantages, but both are built around the same Last For Good philosophy.

DIFFERENT MATERIALS. THE SAME COMMITMENT.

Neither collection is simply better than the other. They offer two distinct material choices for different environments and design preferences. HIVE is ideal for centres seeking colour options, low maintenance and durable, high-grip surfaces. Premium Accoya is designed for those who prefer the warmth and character of natural sustainable timber and a timeless finish that can be maintained and refreshed over time.

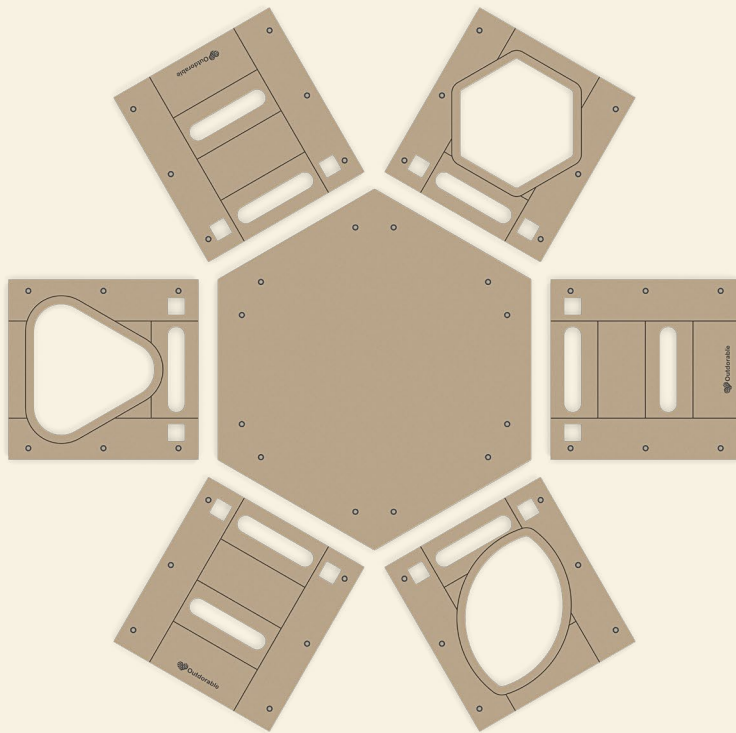

MAINTENANCE AND PRODUCT LONGEVITY

Outdorable products are designed to provide many years of outdoor use. Regular inspection, cleaning and maintenance are important for preserving their safety, appearance and performance.

The 6 Pillars of Whole-Child Development

HIVE Design backed by certification

SAFETY WITHOUT COMPROMISE

The HIVE range has been independently tested and certified to meet relevant Australian, New Zealand and European safety standards. It has also been tested to applicable U.S. Consumer Product Safety Commission (CPSC) requirements and is supported by a Children's Product Certificate (CPC).

Manufactured from durable, non-porous HDPE with powder-coated aluminium frames, HIVE is designed for demanding early learning environments. Its textured, non-slip surfaces provide secure grip in wet or dry conditions, while the UV-stabilised, fade-resistant material retains its colour without painting, staining or sealing.

Backed by our 10-year no-maintenance warranty, HIVE delivers long-term safety, exceptional durability and years of dependable outdoor play.

HIVE Toddler Tunnel Package

HIVE Rope 'n' Rung Package

HIVE Suspension Net Package

HIVE Climb and Swing Package

HIVE Tunnel Explorer Package

HIVE Lily Pad Challenge Package

HIVE Rope and Rung Package

HIVE Toddler Tunnel Package

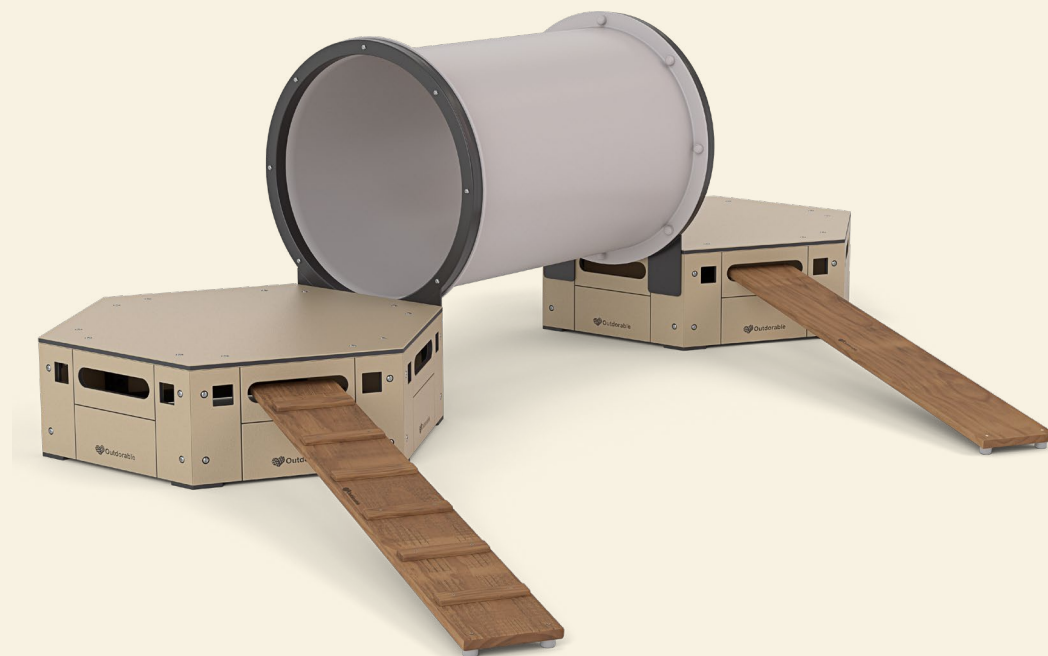

HIVE Toddler Tunnel Package designed specifically for children under three, the HIVE Toddler Tunnel Package creates a safe, toddler-scaled adventure space for crawling, climbing, balancing and imaginative play. Low platforms allow children to explore independently, while the enclosed tunnel supports core strength, spatial awareness, sensory regulation and early social games. The timber challenge planks introduce balance and positional concepts such as over, under, in and through.

Included in this package are:

- 2 x 300mmH HIVE Climber Hexagons
- 1 x Smooth Plank
- 1 x Ladder Plank
- 1 x Tunnel Attachment

You can split some of the pieces from this set to use for younger children in 2-3 years play spaces. Add more planks as you need.

Space required:

Low-height toddler configurations often require significantly less surfacing than standard equipment. Ask our team to confirm the requirement for your yard, it may be smaller than you expect.

HIVE Rope 'n' Rung Package

The HIVE rope 'n' Rung Package includes a crossing that cannot be rushed, rungs underfoot and rope above ask the two halves of the body to work as one, feet judging a gap while hands take the difference. That coordination is demanding, which is why children slow down, concentrate and commit to one deliberate step at a time long before they attempt it at speed.

The progression from careful to confident is unusually visible. An educator standing nearby can see exactly where a child's certainty runs out and what they choose to do next, which is far more useful to see children's development levels.

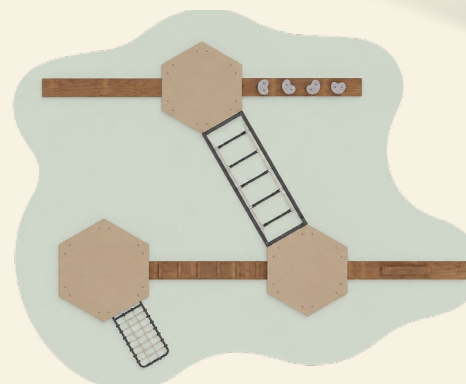

It rewards the quiet encouragement educators are already good at.

Included in this package are:

- 2 x 600mmH HIVE Climber Hexagons
- 1 x 860mmH HIVE Climber Hexagon
- 1 x River Rocks Plank
- 1 x Smooth Plank
- 1 x Ladder Plank
- 1 x Wobbly Log Plank
- 1 x Cargo Net Attachment
- 1 x Rope 'n' Rung Bridge Attachment

Space required:

Soft fall surfacing is required within 1.5 meter radius of the 600mmH and 860mm high platforms.

Configurable

HIVE Suspension Net Package

A surface that changes, tightens under a pull and shifts the moment a second child steps on, so crossing it is less a balance task than a problem being continuously re-solved with the whole body. Children adapt, stall, re-plan and adapt again, which is far closer to how the world actually works than a fixed beam.

Because the net responds to everyone on it. Who goes first. Who waits. Whether to move together or one at a time. Those conversations start without an adult beginning them.

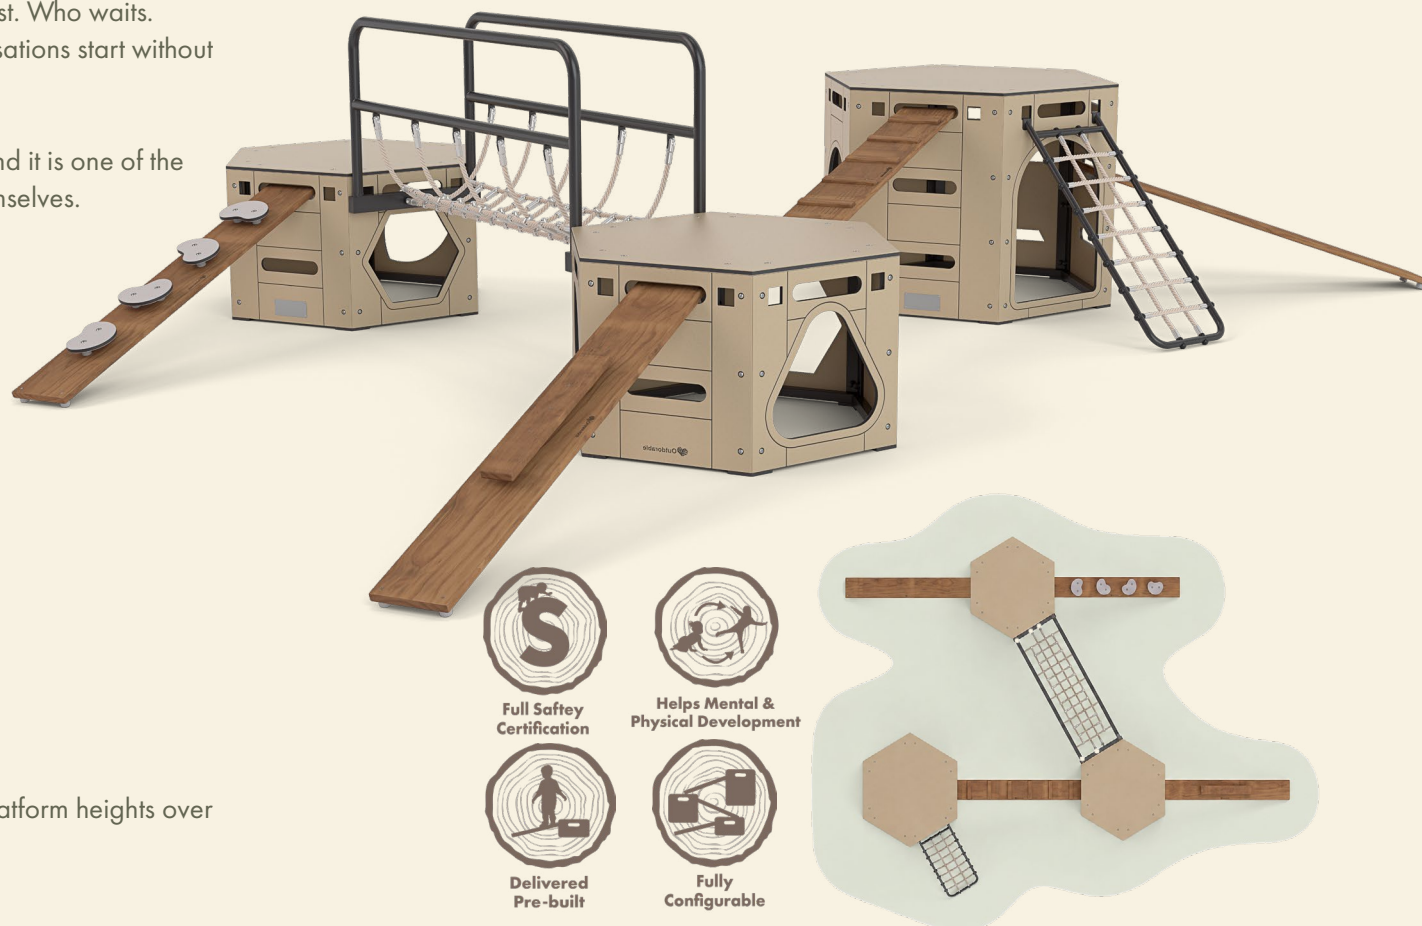

For educators it sits across physical and social learning and it is one of the easiest places to step back and let children sort it out themselves.

Included in this package are:

- 2 x 600mmH HIVE Climber Hexagons
- 1 x 860mmH HIVE Climber Hexagon
- 1 x Smooth Plank
- 1 x Ladder Plank
- 1 x River Rocks Plank
- 1 x Wobbly Log Plank
- 1 x Tunnel Attachment
- 1 x Suspension Net Bridge
- 1 x Cargo Net Attachment

Space required:

Soft fall surfacing is required within 1.5 meter radius of platform heights over 600mmH.

HIVE Climb & Swing Package

Hanging, swinging and climbing a surface that moves ask for grip and upper body strength, bilateral coordination and the whole-body control that only comes from managing your own weight in the air. None of it arrives in one session. Children also support peers and less confident children to get across, practising persistence and getting there on their own.

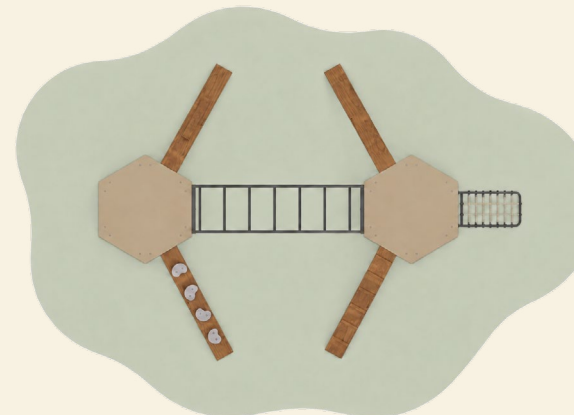

That visible progression is a gift to educators. It gives you something concrete to notice out loud, to photograph, to write into a learning story a family will recognise immediately. Name the attempt rather than the crossing, and children keep returning to the bar that beat them.

The learning here is measured in weeks, and it is easy to see. Included in this package are:

- 2 x 600mmH HIVE Climber Hexagons
- 1 x Smooth Plank
- 1 x Ladder Plank
- 1 x Wobbly Log Plank
- 1 x River Rocks Plank
- 1 x Tunnel Attachment
- 1 x Monkey Bars
- 1 x Cargo Net

Space required:

Soft fall surfacing is required within 1.5 meter radius of platform heights over 600mmH.

HIVE Tunnel Explorer Package

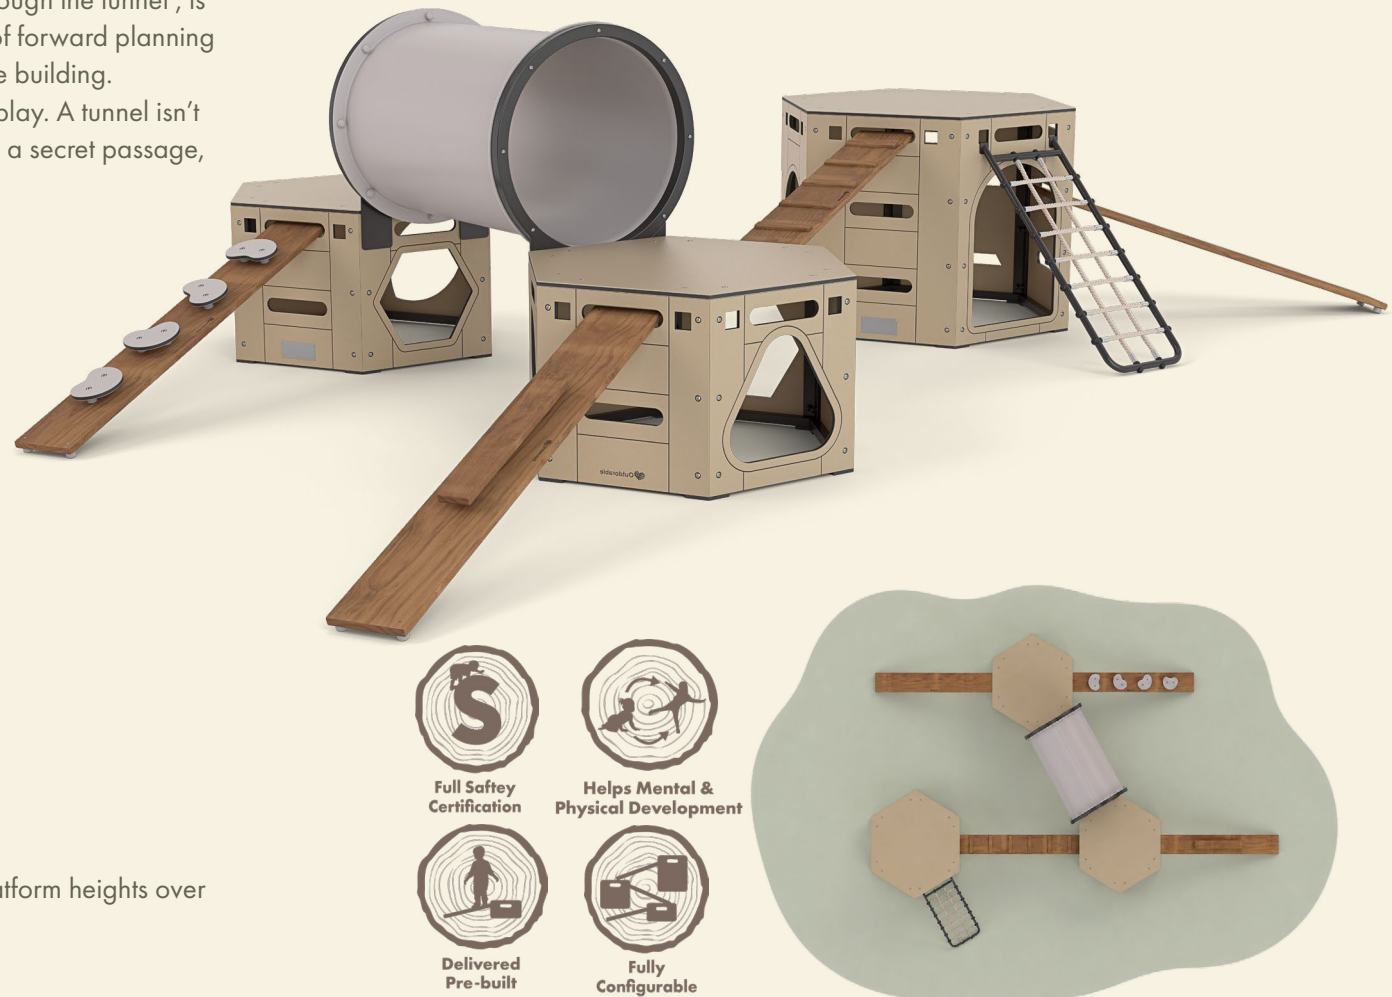

A child who has just climbed upright has to drop to hands and knees, give up their sightline and move through a space they can't fully see. Losing visual feedback forces the body to navigate by feel, which strengthens proprioception and spatial reasoning in a way no open crossing does. Choosing the route in the first place, over the bridge or through the tunnel, is a decision made before the body commits, and that kind of forward planning is exactly the executive function four and five year olds are building. Then there's what an enclosed space does to imaginative play. A tunnel isn't read as a tunnel. It's a cave, a burrow, a submarine hatch, a secret passage, the story belongs entirely to them.

Included in this package are:

- 2 x 600mmH HIVE Climber Hexagons
- 1 x 860mmH HIVE Climber Hexagon
- 1 x Smooth Plank
- 1 x Ladder Plank
- 1 x River Rocks Plank
- 1 x Wobbly Log Plank
- 1 x Tunnel Attachment
- 1 x Cargo Net Attachment

Space required:

Soft fall surfacing is required within 1.5 meter radius of platform heights over 600mmH.

HIVE Lily Pad Challenge Package

The HIVE Lily Pad Challenge Package transforms the classic “floor is lava” game into a rewarding balance and climbing circuit. Suspended stepping pads challenge children to judge distance, place their feet carefully and adjust their balance with every step.

The Lily Pad Challenge Package gives them engaging setup, a suspended run of stepping pads slung between two Hive boxes, each one requiring, considered, brave foot placement.

It works because it is difficult. Not dangerous. A child crossing the lily pads must look ahead, judge a distance, commit their weight and adjust mid-step. It is the most valuable thing an outdoor environment can offer a developing brain.

Included in this package are:

- 1 x 860mmH HIVE Climber Hexagons
- 2 x 600mmH HIVE Climber Hexagons
- 1 x Smooth Plank
- 1 x Ladder Plank
- 1 x Wobbly Log Plank
- 1 x River Rocks Plank
- 1 x Cargo Net Attachment
- 1 x Lily Pad Suspended Bridge Attachment

Space required:

Soft fall surfacing is required within 1.5 meter radius of platform heights over 600mmH.

HIVE Full Hive Package

The Full Hive Package brings the complete range together, lily pads, rope and rung, suspended net, monkey bars, tunnel and climbing ramps, all connecting across a cluster of Hive boxes. It is the largest configuration we offer, and the only one that gives a centre every route the system can build.

What makes it more than a large playground is what happens after installation. With six sides instead of four, each Hive box provides 50% more potential connection surfaces than a conventional square play box, so bridges and attachments can be unclipped, moved and re-attached by your own team.

Included in this package are:

- 2 x 860mmH HIVE Climber Hexagons
- 2 x 600mmH HIVE Climber Hexagons
- 2 x 300mmH HIVE Climber Hexagons
- 1 x Smooth Plank
- 1 x Ladder Plank
- 1 x Wobbly Log Plank
- 1 x River Rocks Plank
- 1 x Cargo Net Attachment
- 1 x Lily Pad Suspended Bridge
- 1 x Suspension Rope Bridge
- 1 x Rope 'n' Rung Bridge
- 1 x Monkey Bars Attachment
- 1 x Tunnel Attachment

Space required:

Soft fall surfacing is required within 1.5 meter radius of platform heights over 600mmH.

HIVE Customise your package

'The worlds most configurable playground'

Fixed VS *Flexible* playgrounds

Conventional Fixed Playground

Permanent and familiar

- One layout for the life of the structure provides consistent, predictable play
- Often requires excavation, footings and installation downtime
- Difficult to expand, relocate or adapt as needs change
- Familiar pathways can offer less challenge over time
- Large expense
- Non adaptive for different abilities

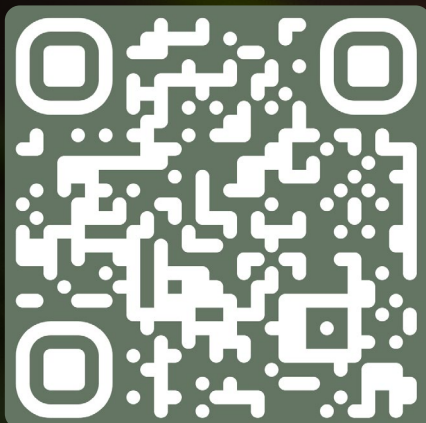

Outdorable Reconfigurable System

Built to change and grow

- Reconfigure layouts to create fresh challenges
- Adapt difficulty for different ages and abilities
- Add components progressively as budget allows
- Relocate equipment between spaces
- No installation and site disruption
- Delivered Assembled, unpack & play
- Replace individual components when needed rather than the entire structure

"When nothing is fixed..
Anything is possible "
